a way of life*

## *Beverly Hills Water Tracker Announcement*

### **Rain is Here!**

#### **Turn off your Irrigation.**

Rainy weather is upon us, which makes it a great time to turn off your irrigation system. Watering your plants is not necessary when nature is doing it for you. It's also unnecessary for at least two days after it rains and often for much longer.

### **Water and Wastewater Rate Adjustment Town Hall Meeting**

On February 20, 2024, the Beverly Hills City Council will hold a public hearing to consider the Proposed Rate Adjustments. To further educate the community, there will be a town hall meeting today, February 1st, at 6 pm, which you can attend in person or via Zoom. Please visit [www.beverlyhills.org/waterrates](http://www.beverlyhills.org/waterrates) for more information.

**To view the recording of the first town hall meeting please visit:  
<https://vimeo.com/904129577>**

**BEVERLY HILLS**

### **3 EASY Tips for a Staying Sustainable During the Winter:**

#### **1. Put On Warm Clothing**

As soon as winter comes around, take out all of your winter clothes and get your closets ready for the cozy weather. Your body is very capable of keeping you warm and bundling up in multiple layers will help keep you warm! You can also use blankets to stay extra toasty.

#### **2. Keep Your Body Moving**

Step outside to go for a nice walk. Your body will stay warm if you keep it moving!

#### **3. Buy Produce That Fits The Season (buy locally if possible)**

Many vegetables grow more easily in the wintertime than in other seasons such as pumpkin, squash, cauliflower, potato, leek, beetroot, mushrooms, and many more delicious veggies! As a result, they use much less energy to grow and therefore have the least impact on the environment.

### *Earth Day 2024*
